MOVATRACK K100 ANTI LIGATURE

Features:

The rigid, high-grade aluminium track section and maintenance-free, wheeled roller hooks are just an introduction to the Northgate Hadar shower track system. Designed to give years of trouble-free service and specifically for high-risk mental health areas, this shower track system uses magnetic wall-fix brackets where tracks meet the wall, and magnetic top-fix brackets where suspension hangers meet the ceiling. This ensures that, under excess load, the suspension hanger separates from the ceiling bracket leaving no remaining points of ligature - a highly essential safety feature, as it is surprisingly easy to attach a cord to a fixed vertical rod and use it as a ligature point.

Benefits:

Strength and simplicity make the K100 the first choice for a full number of applications. The maintenance-free, premium quality track system has a strong and attractive aluminium profile which offers you more for less, in that it is able to span 2.5 metres between hangers, providing long term reliability. In a similar fashion, curtain removal points are provided as standard on every track for added convenience when replacing curtains. The self-lubricating roller runner hooks are quickly loaded into the track through this point of access, making the process a pleasurable experience. Mounted on magnetic brackets for 100% fail-safe anti-ligature functionality.

Options:

Silver anodised track; Any RAL colour available to order; Biosafe® antibacterial treatment option available within white powder-coated finish only.

Specification:

The Movatrack K100 magnetic anti ligature system as manufactured by Northgate. Track manufactured from premium quality aluminium with white powder-coated finish. Complete with roller runner hooks at 10 per metre, and magnetic wall-fix / top-fix brackets spaced in accordance with manufacturers recommendations. Fitting to be carried out by trained and accredited personnel.
